ENERGY MANAGEMENT AND MONITORING CONSUMPTION

The hotel technical services department is obliged to maintain an energy recording program. The required data is being fed by the operations on a regular interval, monitored by the chief engineer.

Hotel operations, which have problems with energy costs or consumption must request the help of the Regional engineer. A basic information service of the head office is free of charge, in the framework of management contributions. For a more comprehensive survey a specialised office must be contracted by the operation.

At the hotel operation level, it is the chief engineer, who is basically responsible for monitoring energy consumption. All data in the hotel is recorded in accordance with the energy consumption program.
